Human resource

The HR activities and services were centralised in the Human Resource Division in line with the Company's philosophy of operation within the framework of the organisational restructuring completed on 1 June 2013.

The main profile of the HR Division includes HR Services [1] [2] (wage accounting, social security administration, etc.) and the delivery of HSE [3] and Training [4]. Our services support primarily the operation of the subsidiaries of the MÁV Group, yet we also offer competitive services through our effective and high-quality operation to several companies outside the group.
