100a  
vonal

Értesítjük tisztelt utasainkat, hogy

**2021. április 06-tól 2021. június 18-ig**

**Vecsés – Üllő** állomások között végzett pályakarbantartási munkák miatt a **100a Budapest-Nyugati – Szolnok** vasútvonalon módosított menetrend szerint közlekednek a vonatok.

**Felhívjuk figyelmüket, hogy egyes vonatok eltérő megállási renddel közlekednek, valamint rész, illetve teljes útvonalon lemondásra kerülnek. Néhány vonat kivételével a vonatok Budapest-Nyugatiból korábban indulnak és Budapest-Nyugatiba később érkeznek, Budapest-Nyugati – Cegléd között hosszabb menetidővel közlekednek.**

Néhány vonat kivételével a zónázó vonatok megállnak Üllőn és Hosszúberek-Péterin is. A monori személyvonatok rövidebb útvonalon Budapest-Nyugati – Vecsés viszonylatban közlekednek, óránként Vecsés – Üllő között közlekedő **vonatpótló autóbuszos** kiegészítéssel. Munkanapokon délután Budapestről 14:38-tól 18:38-ig óránként gyorsított vonatok indulnak Cegléd/Szolnok felé Vecsés, Monor, Monorierdő, Ceglédbercel, Ceglédbercel-Cserő megállásokkal, illetve további **vonatpótló autóbuszok** közlekednek Vecsés – Monor viszonylatban.

A szegedi InterCity vonatok többlet megállásokkal közlekednek. Minden vonat megáll Monoron mindkét irányban, illetve délután 13:43-tól 20:43-ig Cegléd felé Pilisen és Albertirsán is.

Néhány vonat kivételével a 100 sz. vasútvonalon közlekedő IC vonatok a Budapest-Nyugati – Cegléd szakaszon a 100 sz. vasútvonalon közlekedő sebesvonatok, valamint a Cegléd – Nyíregyháza szakaszon közlekedő személyvonatok szerelvényével egyesítve közlekednek, az így egyesített szerelvénnel közlekedő IC vonatok Monor állomáson minden, míg további 100a vasútvonali állomásokon egy esetben megállnak. A vonatok szerelvényei Cegléd állomáson kerülnek szét- illetve összekapcsolásra.

Reggeli időszakban Budapest felé több vonat összevonva közlekedik.

Az **S 6195, S 6225, S 6103, 1633, S 6213** és az **S 16303** sz. vonatok **7** napokon kerülő útirányon át közlekednek, Szolnok és Budapest-Nyugati között nem állnak meg.

**A vasútvonal részletes vágányzári menetrendje megtalálható az állomási pénztáraknál, ügyfélszolgálatoknál, illetve elérhető a**

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    | ...   |        | 11 59 | ...             | ...         |       |        | ...   |        | 12 59 | ...                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                    | ...   |        | ...   | ...             | ...         | 12 22 |        | ...   |        | ...   | ...
